The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

Hello everybody out there in the real world!

I'm here in the PAC [Pacific Area Command] RPF [Rehabilitation Project Force] and I'm going to tell the world the nightmare we are going through here in the west wing of blue PAC building, where we are all being secluded from the world. Come by and look at the windows of the 2nd floor of Catalina street. You will see white plastic in front of all the windows, so we can't be seen by anybody from the outside! Hopefully I will be allowed to get out of here soon...

I have watched several people that managed to blow (blow = leaving without permission, Scientology term) from the RPF. If the person is "recovered" by the PAC "security" they are put into the RPF's RPF. That is a Rehabilitation Project Force to the RPF itself! Talk about being subdued and treated like a rat! The members of the RPF's RPF can not even talk to other members in the RPF! The punishment for the others in the group when someone blows is horrific! The "security" is increased from having one buddy watching you all the time, to TWO persons being with you all the time. When you are in the basement painting or doing some work off the crew lines, and have to go to the bathroom, the other two persons have to come with you and "watch you", and each other, waiting outside the can until you are done! Can you imagine how ridiculous that is? You can't even go and take a dump in peace! I have seen others getting a "Fitness Board Turndown" in order to get kicked out of the Sea Org. There is an elaborate administrative procedure to be allowed to leave. One must have a "severance pay"of tiny $500 to be allowed to leave. Can you believe it? After all those years of trustworthy service to the Sea Org, you get $500 and are kicked out into the street. I have no clue what it costs to live in the real world these days, but I believe the $500 will last about one week. I think a month's rent in LA is something like $800 to $1,000. Is that right? Having worked day and night for many years as an Executive, "helping others" and following orders, we get 500 bucks! And it takes forever, months and months sometimes before people are allowed to leave. We're told that "it's not approved in the FP yet" (FP= Financial Planning, done once a week and the money is then dispersed to what it is approved for). Meanwhile the guys trying to leave are in the basement like rats, kept away from any staff members and out of the view of any public, so as to "not upset them" or "cause enturbulation" for them. We are in the basement scraping paint off the floor, 10 hours a day, painting old dusty pipes with color coding, which is being glorified with "we are doing great work that the staff will be proud of". Who cares if the damn pipes in the basement are red, green, blue or black? There are many people that have been dismissed from GOLD and sent to the RPF. Probably they didn't get along with "the Management" or David Miscarriage (misspelled?) I think they are getting rid of the smart and clever guys that are a threat to expose DM's international fraud and police organization.

If you have taken any services in the past or wonder where some people in the Sea Org are these days,

I will list out for you, from the top of my head, who is right now here in the RPF, or recently graduated, or who has recently blown or has been SP declared or "Fitness Boarded" out of the Sea Org with a "probational SP declare". This is something new that has been invented. Another piece of squirrel administrative technology. Nobody can find a reference what that is. One is declared a Suppressive Person on a probational basis. One still has to "make good" (do the steps A to E, AND a personalized "re-entry" program) to be able to come back, but one is not "officially SP declared" on the standard lines with an issue that goes to everyone. If every SP Declare was published, lots of Scientologists would be enturbulated, because there have been so many. Basically, one is told to "shut up" and if you make any noise you will get declared! Anyway, I'm not afraid to tell everybody about this, as I will probably be SP declared the second they find out who it is that is writing this IN THE RPF!! Thank God I have a friend that is helping me to get the information out to the world so something can be done about this. Let's see how long it will take for the smart guys at INT and OSA to figure out who it is that is helping me. Well, I think PAC security better get on the stick or they will be losing some sleep and have some extra work to do...

I have a lot more to say, and I can tell you a lot about all these peoples' lives and dilemmas. I have enough to write a book, which I plan to do, as soon as they kick me out! Stay tuned for further updates...

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

As I was telling you earlier, there is this total frantic control of all the RPF [Rehabilitation Project Force] members. We are not allowed to be seen by anybody, public or staff. This is supposedly upsetting the regular staff so much on their jobs that we are being secluded from the world. I think they are doing a pretty good job at it, because I'm sure that you don't see about 170 people running around in grey T-shirts do you? Grey T-shirts are by the way "our uniform". We are hidden in the west wing of the building and in the basement. We are also working on top of the building that is called the "old services building". This is a secluded space where noise from the air conditioners drowns out any sounds of our work of sanding wood or other construction projects. This is the building were the crew laundry is and the one next to the motorpool gate.

There is an ongoing project that has been worked on for years now, consisting of "moving the RPF spaces to one location". We spend a lot of time renovating rooms and moving personal belongings around. For over 10 years, the RPF used to be located on the 2nd floor of the Lebanon Hall building, which is right in the middle of the complex. The RPF grew in such number that there was no place to berth everybody and the living conditions were getting just too crowded. The RPF has been very busy moving rooms from one building to another, full offices, all equipment, beds and everything. We are now out of the Leb Hall since a bit less than a year and are now all in the Main building west wing. One of the reasons we had to move everybody over to the other side, was because we were "running into crew" all the time as the main path is just outside the main dining room. This apparently upset them and distracted them so much from their daily routines that we have to be segregated with force. In order to implement this fully, we had locks installed on the emergency doors that go out to the roof between the buildings and we have to travel on that route to not be seen! Only certain people have the keys. and we can not even go back and forth between the buildings, without someone coming with us to totally control that we don't meet any other crewmembers.

This project has now coming to it's last stage, where the confidential OT course room is getting moved also, as the students running back and forth are creating so much "traffic" that the OT III and OT V course rooms have to move. This is a big evolution as the "OT Materials" have to be kept in a safe and be checked daily by the security guards. The place has alarms and one can not come in or out without a key and a magnetic security card. Only OTs are allowed to access this area. The evolution is slowed down however as there are quite some material costs involved, and the new security system and location has to be fully approved by RTC, the top police organization of Scientology. The paper mill of approvals of such big changes takes forever. The Scientology bureaucracy is worse than the government! Wait, wait wait. We even started to move and build the new course room, and we came to a dead halt, as we jumped the gun - it wasn't approved yet!

All the berthing spaces moved over to the west wing and everybody in the RPF is now living and

studying there. Even the RPF I/C's [In Charge's] office is at the end of the building next to the course rooms by the stair well. We have the berthings on the 2nd floor, both sides. Just look for the white plastic in front of the windows. This was put up to hide the bunk beds that go up to the ceiling!!! But can you guys believe this: There are about 16 guys in one little room, 4 bunks high. It's so small that it's impossible to have everybody be in the room at the same time, so we have to go to bed staggered in shifts! Another room that is a bit bigger has about 50 men in it. It's 2 rooms with a wall knocked out. The windows are only opened a little bit but there is no ventilation at all. Can you imagine how it smells at night, when 50 sweaty hard working guys take their shoes off? Then you think that one would be able to sleep being totally tired or wiped out from a full day of hard work, but sometimes I can't even sleep because it's horrendous to listen to a bunch of people that snore! The women also live in small rooms with about 15 - 20 in each. They are also complaining of bad smell and snoring! I'm actually wondering how it feels to live in a regular bed with clean sheets and fresh air, after all these years. Hopefully soon I will be able to experience a real life. By the way, if someone could arrange to have the Health Department come and inspect this area, maybe something could be done about this terrible living situation. It's hard to believe that we have an invisible prison right in the middle of LA. A bunch of sardines packed together in terrible living conditions. If the city would inspect this area, I think they would close it down. It certainly is not humane... let alone religious. I have to go.....

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

I'm not sure what reaction I'm creating out there and if this stuff is really making any difference on anybody, or if this is even making it onto the Internet. I will however take advantage of this weak link in the security system for as long as I can to let everybody know what it's like here in the RPF [Rehabilitation Project Force]. Isn't it terrible to have an enemy in your own camp? Let's see how long it will take OSA, CMO, INCOMM and PAC [Pacific Area Command] Security to figure out who is MY FRIEND, helping me to get this data out to the world!

For those who don't know what these abbreviations stand for, I will explain briefly; OSA = Office of Special Affairs. Their Int[ernational] Headquarters are located on 6331 Hollywood Blvd on one of the top floors. This is the police branch of Scientology who are frantically trying to stop the real facts that should be know about what is happening IN Scientology. (Ironically, a lot of OSA staff have been showing up in the RPF lately). CMO = Commodore's Messengers Organization, usually teenage SO [Sea Organisation] members that are pretending to have the power of L. Ron Hubbard, and are policing and ordering around the organizations to comply with orders, do investigations and get rid of those who are dangerous to the expansion of Scientology.

INCOMM - stands for International Network of Computer Organized Management. Maybe you didn't know this but their headquarters are right next to the RPF. Their main entrance is around the corner on Fountain Avenue. The two low buildings on each side of the long stairs leading up to the old entrance of the hospital has the main computer bank for Scientology internationally. This is the heart of the computer banks that are tracking and controlling all programs and orders internationally. It's very sophisticated and advanced. I can tell you more about this later, but what happens when a report is written about a situation or on a specific person, the document is scanned into this databank. This is being done on every continent on the planet, then the management sitting in Hollywood can pull up any of these documents on their screens, and find out data about any person, their post (what we call their duty and job) or any non-compliance to orders. This data bank is tracking all this information, and creating floods of ethics chits on everyone!

I wanted to tell you what happens when you enter the PAC base; You are on the candid camera!! I'm sure you have noticed that there are cameras in the area, but do you really know how many there are? HUNDREDS!! they are in the canteen, on L. Ron Hubbard way, on the roof tops, posted all along the street, by the parking structure. They're inside the AOLA [Advanced Organization of Los Angeles] building, in the ASHO [American Saint Hill Organization] building on every floor that has any important reason to be watched. Also in the basement in every hallway where we are working. This is because all the folders that are "confidential" from auditing or that have "OT information" in them, have to be watched by PAC security. Look a bit closer on the base, you find thin poles about 8 feet high that bend down and have a black bulb. It looks like some kind of nice lamp that would turn on at

night, but what is really in there is a CAMERA! These cameras are scanning back and forth all the time and are monitored by Security which is located at the entrance on Catalina Street. They are next to the "horse shoe," the old moon shaped drive way. This was the emergency entrance when it was a hospital in the old days. Behind these walls you have the Security Chief and his fellows sitting around the clock, in shifts watching about 100 TV monitors. "On the ground" there are security guards on bicycles driving around with walkie-talkies who are dispatched by central, if some intruder or suspected person shows up. This is how YOU are being "detected" if you show up around the big blue building. The "eye in the sky" is watching you all the time, I'm sure they have it all hooked up to a video camera and keep tapes rolling 24/7 and put them on file. Walk up to one of those black bulbs and smile, because you know that a security guard is sitting there watching you!

I mentioned a few times that this was a hospital. Just for the record, this was the old "Cedars of Lebanon Hospital" aka as the "Jewish Hospital." It was built around 1929 and in the mid 70's, the story is that L. Ron Hubbard bought this hospital. It was trashed and a mess, and we have been working on getting it fixed up and renovated since it was bought. MANY RPF members have been through their "programs" there to get the building renovated and upgraded. I could write a book about horror stories of the RPF members, working in the basement. One specific area is called "Rats alley." It speaks for itself! Members that for one reason or another had to be punished were thrown into this small space, with rats all over the place, rotting and eating each other, along with thousands of cockroaches, to clean it up. This was done so one would "get ones confront up." I'm glad this was finally fully cleaned up, so I didn't have to face this nightmare.

In an earthquake some years ago, the main building was severely damaged and construction work had to get done. The building is like a huge V with a base on it. The base of the main building has sheer walls now put in, with concrete from the bottom to the top. Also the East wing towards AOLA, but the other side is yet to be done. The top of the building that has been under renovation for years, is undergoing construction for the same reason. Lots of concrete has been taken out, with fear that it would break off and fall down in another earthquake. I believe that it remains looking so shabby because there is not enough money to get it fixed. There are some plans being worked on right now to get the building utilized for the public. One big project is to relocate the many overflowing folder tanks in the basement. The PC folders (Pre Clear folder = the continues documentation of the confessionals of a person. These folders are legal size manila folders, about 2-3 inches thick. Every PC can have anything from a few folder to over a hundred, depending how much auditing they have paid for or sec checks they have gotten) There are around a half a million folders in the basement and another half a million folders AT THE BOTTOM OF THE PARKING STRUCTURE BUILDING! The overall plans for the future is to get a warehouse close to the base and get all these folders moved. The basement can then be used for something else -- maybe keeping the ever growing RPF down there? Right now some of the RPFers are very busy working on getting all the folders fixed up and the covers replaced. This is ordered by RTC and certain goals and targets have to be met and complied to. There are "expansion plans" of turning the main building into accommodations for the public coming to the base. Where they plan to put the crew - I have no idea. Well, that's the "expansion speculations" but it doesn't seem to move very much. The RPF used to have tons of work to do, but now we are mainly being kept busy doing renovations inside the building so we can't be seen! Did you know that the entire complex was stained blue by RPF members? Yes, we did all that work, with many dangers, dangling off the walls in ice cold wet weather or sweating in the hot summer weather. Well, got to go now, running out of time. Need to get this information off to my friend so it can get out to you as fast as possible. Talk to you later...

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

Maybe you have gotten my earlier newsletters, maybe not. In the hope that you have, I will continue to write what might interest you about what is happening behind those blue walls in the RPF [Rehabilitation Project Force].

Do you know why there are so few guys that graduate the RPF program? Well, check this out. A new "Final Assessment" came down from INT [Gold base] about a year ago. A "twin-ship" has to assess this list on each other on the E-Meter. There cannot be any reactions or reads on the needle at all, on the following questions. The slightest bad thought or incorrect idea in any of these areas would create a reaction on the needle. About 30-40% of the entire RPF is on this last step - BUT ARE NOT MAKING IT THROUGH! This is supposed to be a "final check" on the entire program, which takes an average of 1-2 years although some guys take much longer, for example Ken Shapiro has been on the RPF for about 6 years. Great PR [Public Relations] and expectations have been shoved down our throats that the RPF should only take 6 months, which is practically impossible. It's a twisted dream turning into a nightmare and many twinships at the end of the program are really getting frustrated and are not making it through.

One example of this is Majbritt Wheelis and her twin Felipe Avila. They were on the lines to GRADUATE for months and they couldn't make it and they got kicked out. Some elaborate reason why she didn't make it, making her guilty for not performing her duty as a Case Supervisor in the RPF and other things from her ethics file, got her SP DECLARED! She had no place to stay locally and she was on the phone to her mother in Copenhagen in Denmark, begging for a place to stay, until she got a job and "back on her feet." If someone would see this over in Denmark, please help her out, she's a very nice girl. I was devastated to see what happened to her family life. Her husband Alec Wheelis graduated the RPF last year, and he was on a recruitment tour for the Super Power project, I believe over in England. He wasn't informed or told anything about his wife and she was told she would have to handle the divorce later on so he would not be enturbulated. What kind of decency is that? On top of it all, her mother-in-law, Alec's mother, is here on the RPF also. Her name is Leslie Epstein. She worked at GOLD for many years. Her husband John Epstein is also here and they had to witness their own son's wife being SP declared and kicked out - never to be seen again. I saw her SP declare order when it was on the bulletin board and it sounded like it was just made up to get rid of her. Her twin Felipe, did not get officially SP declared, but only "probationally SP declared," with no issue, but basically told to "shut up" or you will get SP declared. I saw a big smile and relief on his face when he was finally allowed to get out of here!!!

Someone decides "that's it" no more chances and then evidence is held against you and you have no defense against "Scientology Justice." If some high exec decides you are out -- then you are! This final assessment for graduating the RPF is a printed list and available to any RPFer so it's easy to get hold

of. How would you like to have these questions barked in your face, while on a video camera? Then expecting that it's a clean needle on the emeter, and you fully agree...

1. Regarding Int Execs, do you have an evil purpose?
2. Regarding Int Execs. do you have a vicious intent?
3. Regarding Int Execs, have you been spreading Black PR?
4. Regarding RTC Execs, do you have an evil purpose?
5. Regarding RTC Execs, do you have a vicious intent?
6. Regarding RTC Execs, have you been spreading Black PR?
7. Regarding LRH, do you have an evil purpose?
8. Regarding LRH. do you have a vicious intent?
9. Regarding LRH, have you been spreading Black PR?
10. Regarding LRH, do you have any bad thoughts?
11. Are you secretly disaffected with Management?
12. Do you have any withholds from RTC?
13. Do you have any intention to stop Scientology?
14. Do you have any intention to stop Scientology dissemination?
15. On your RPF program, has an evil purpose been missed?

This has to be done on a video, with a close up on the dial and the PreClear holding the cans. It's done as a full formal session and if you go to the examiner afterwards and your needle is not "floating," meaning that you are happy and agree, then you have to go back in session again -- over and over. When you think you have a "clean assessment" you send it to the RPF I/C for inspection and when he agrees he sends it on to the Senior C/S WUS in CMO across the street for final approval. When it's approved for both you and your twin, you have filled the last requirement on the program and can submit your full data for final approval to RTC to graduate. Of an average of 180 RPFers, there are 1 or 2 twinships that graduate every 4-6 months. There are many more being assigned to the RPF in that time period and there are quite few that get Fitness Boarded out if they don't move on the program with their twin. You are basically 100% responsible for your twin, and anything happening to him/her is your responsibility. In other words, nobody is graduating alone, but always and only with your assigned twin. For some reason there have been quite a lot RPF arrivals over the last few months coming down from Int or OSA or GOLD. They don't look happy. Maybe they have disagreements or they cannot put up with the Management or the regime of David Miscarriage or are unable to please him with what he expects out of their abilities. For some reason it's not a priority for us to see the International events anymore. It used to be "an information line" to let all RPFers know what is going on. We were about to see the LRH Birthday event in March this year, and were seated and ready to see it, then the RPF I/C came in and canceled it. We had to go and clean our rooms and then go to bed. Maybe there was something on there that was not good for us to see?? Usually the glorious Birthday Game is the highlight of the year, it covers all the big wins and international expansion. I'm really curious to find out why we couldn't see it, and I will, once I get out of here...

Everyone assigned to the RPF has to sign a waiver that one is doing the program on his on volition for the purpose of getting oneself redeemed. No one is forced to do the RPF and technically people are not held here against their will, but nobody wants to be here. I believe that the majority are working hard on this program, originally outlined by LRH on the ship Apollo. They want to "make good" and "be forgiven" so they can get back in the group and back to their old buddies and "help clear the planet." It might sound fanatic and it is. But that's what is crammed in to your head when working in the Sea Org. After many years, you forget how important other parts of life are, like any interests, sport, hobbies and much less having any kind of decent family life. So RPFers dedicate themselves to do all they can, and they hang in there year after year on the RPF trying to graduate -- however, one day you are told, "that's it!". Your time is up and you didn't make it, so you get Fitness Boarded out of the Sea Org. Then you get dumped on the street with severance pay of $500.

There is a totally different approach for someone who WANTS to leave. If you say you want to leave, this is called "a blow." Then you get sec checked over and over and not until several questions have been totally cleaned and you have a "floating needle" are you allowed to complete the rest of the steps to finally be able to go. I remember seeing Chuck Beatty on the line to route out of the Sea Org here in the RPF. He ended up having a personal "baby" watch for ALMOST 1 YEAR! Under watch 24/7 and obviously he could not get those specific questions clean as he did not agree with many things. He was at GOLD or Int for many years and I believe that he must have a lot of information about many people, of what happened up there, why they were so carefully trying to make sure that he would not turn on the church or management. I'm sure he disagreed with a lot of things. But for a full year! The lowest paid job anywhere, I would believe is something like $7.00/hour. He could have made $20,000 in a year flipping burgers at McDonalds. The pay in the RPF is 25% of full pay, which is $50, so after tax you end up with $11.46 in your hand - PER WEEK!! That is barely enough to pay for hygiene supplies, much less for any coffee or cigarettes!!

Personally, I hope that I will live through this insanity while maintaining some sanity of my own until I get out in the real world, to start all over again. Having no credit card, no ID, drivers license or family, I will start over somehow. I'm sure I will find someone that agrees with what I'm letting everybody know in my newsletters. Thank God that I have a friend very closeby who can get the data out for me. I hope to see you soon on the brighter side of-another life!

Hello everybody out there!

.....I told you about all the cameras on the base, and here's another hot tip. Do you know how to tell when DM [David Miscavige] is on the base? Well, it's easy to find out in the RPF, because we are told that we cannot go out to Catalina Street, for any reason. It's off limits and security is watching the area full time. The way you can tell is if you see 2 dark SUVs pulled up into the "horse shoe entrance" with another 1 or 2 classy cars. DM is never alone and is guarded by several people at all times, but maybe you could go up to him and say hello and see what happens. Probably security will stop you, but sometimes he stops and listens and will ask a bunch of questions. I have experienced this myself - unfortunately not to my well-being or betterment. When he comes to the base, his personal suite is prepared for him on the 5th floor in the West wing (directly above the RPF berthing on the 2nd floor!). This luxury room, decorated with leather and brass and other luxury items is used only when he is there. The rest of the time Commodores Messengers keep the area clean. He also has an incredible luxury suite at 6331 Hollywood Blvd. The entire 13th floor is his and it's decorated with the most expensive and nicest furniture and decorations that you can imagine. The RPF has been up there renovating and cleaning the area. Both areas are kept secure with card reader systems and elevator access etc. When he's not in LA, which is often, I believe that this entire floor is unutilized but has to be kept ready for him at all times. He has similar set ups for himself where ever he goes in the world. He goes to Freewinds and Flag off and on. He likes to do "inspection tours" in the areas where he goes. So if he comes to PAC for a day or so he might go through all the local organizations rapidly, LA Org, CC Int, ASHO, AOLA or just concentrate on a particular SO Org or "handling." Much of the time, he's at the Int Headquarters at Hemet, southeast of LA. So, if you see someone getting out of those dark vans who is about 5 foot tall, the shortest in the crowd - that's him!

Hello again out there!

.....You see what happens when you start the program, you have to turn in all your IDs; drivers' licence, passport, VISAs, credit cards, cash etc. My credit cards are probably expired anyway and I can get new ones. I can always figure out how to get some new valid ID. All RPFers' valuable documents are kept in a file cabinet locked up so that you cannot take off with your own documents. You are also not allowed to have more than $20 in cash in your pocket, and if you manage to save up more, instead of spending it in the canteen, you are supposed to turn it in for safe keeping. I guess another freak-control-mechanism, making it really hard to blow. If the RPFer is not from the US, a passport is obviously needed to get home, and it would take some time and money to report it stolen and get a new one. I guess the idea is that security will be able to find you "off guard," without any ID, job, money, credit cards etc. I can imagine that it takes some guts to blow not because you're fed up with the scene here but for the main reason that you are hitting the streets with no money, no ID and no place to stay...

What I wanted to say with this letter is something that I have had a lot of attention on for quite some time. Specifically there are two RPFers that are REALLY SICK AND NEED OF PROFESSIONAL MEDICAL CARE. I will take one at the time. The first RPFer is named Uwe Stuckenbrock. He arrived in the RPF here in PAC around 2001, but I believe he was on the RPF in Happy Valley before he came here. He is diagnosed with MS, Multiple Sclerosis, a disease that from what I understand (from having looked it up in the encyclopedia) there is no known cure for. Over the last 3 years, I have watched him getting worse and worse, though it seems that he is getting some of attention and care. When he arrived he had a hard time walking by himself, and this has deteriorated to the point of needing full time around the clock assistance. He always has one or two other RPFers caring for him, as at this point he cannot even make it to the bathroom by himself. He cannot walk at all now and he has to be taken around in a wheel chair. What I don't understand is that although he is being treated with a lot of natural foods and juices and vitamins and assists he's getting worse and worse. He does go to the local hospital sometimes with two people escorting him. He's getting checkups at LA County Hospital or somewhere, where the church is getting free service on Medicare, because we RPFers simply don't have any money for any medical bills. Not long ago, we had to prepare a separate room for him on the 2nd floor in the West wing, next to the stairwell towards Catalina Street. He had been in the hospital and in critical condition. When he came back he needed a cleaner, more private environment to recover. We spent several days gutting out a little closed off room (where the other guy was living that I'm going to tell you about, Mike Eves). The space was filthy and outrageously dusty, like it hadn't been cleaned for months. We repainted the entire room, put up new curtains, put in a new carpet, new cabinets, etc. Uwe was living in a little curtained off space in a room with about 50 other guys.(the room I told you about earlier, with the

bunks crammed in and up to the ceiling.) It was decided that Uwe's condition was more critical than Mike's, so we were ordered to switch their places!! Mike was recovering from a very critical operation for cancer, and HAD ONE LUNG REMOVED! Having watched this scene going on for years, it is obvious to me that THESE TWO GUYS WILL NEVER MAKE IT OUT OF THE RPF ALIVE! It's technically impossible, as you have to "make someone else better" i.e. your twin, in order to graduate. These guys don't even have twins and are just fighting to stay alive. Come on! Uwe cannot even get up to go to the bathroom. What in hell is he doing in the RPF?? He cannot be getting enough professional care and attention and it's INHUMAN to watch what is going on. All the other RPFers are probably also outraged, but are suppressing their own feelings, in the hope of not missing their own chance to get out of here. I'm actually wondering how long these guys will survive and why they are not granted some forgiveness for whatever they were assigned to the RPF for. Human decency would be to sign them in to a proper nursing home to recover or at least die in peace. The one theory that I have is this: Uwe Stuckenbrock was the International Security Chief at Hemet. O'boy! What would happen if he had the opportunity to let the world know what is going on up there or the security issues that exist all over the planet. I'm sure that he's kept in the RPF so won't be able to leak any data out. When he arrived on the RPF he was at the caselevel of OT III and from what I heard, don't know if this is true, but his MS turned on while he was auditing on this level. So what has been done over the last 3 years to "handle" this? He completed OT III, was audited through OT IV and has been getting sessions on OT V for at least one year - I guess in the hope that he'd be getting better, but he's NOT IMPROVING! He is getting worse!

OK, the next guy, Mike Eves. He also came from INT. I believe that he arrived around the end of 2001. At first he was auditing and had a twin and was doing the official program. For some reason he got sick and it turned out that he had lung cancer. It was so critical that it was thought to be terminal, but through some miracle he managed to survive. He had an operation and they took out one of his lungs and he spent the last 2 years recovering from this tragedy. And get this: his wife Cherie Eves (also in the RPF) was assigned to care for him and she did so excellently. She was with him day and night for months and his son Paul Eves, (ALSO HERE IN THE RPF and also from INT headquarters!!) was with him in the hospital. I believe he was so critical that he might die so he was allowed to be attended by his son and wife. Can you believe it, the entire family in the RPF under these conditions? Cherie "graduated" not long ago and went back to work at Bridge Publications. She is responsible for the printing and publishing of new LRH books and volumes coming out. I just don't see that they will EVER get back together as a family. Since Cherie is gone, Mike looks very lonely and it must be hard to be in a room alone with nothing to do. The RPF rules apply to him to; you cannot have any news papers, cannot listen to any radio, no CD's or any music of any kind, much less any TV. TOTALLY CUT OFF FROM THE ENTIRE WORLD. By the way, you cannot read any novels either, only books written by LRH. He looks depressed and very unhappy, and I wish I could do anything to cheer him up. I don't see any hope of any future for him, as it is right now, he is also doomed to die in the RPF, as nobody is "letting him off the hook." I have no clue what he was doing at the INT headquarters, but obviously he is a danger and menace to David M's regime, and is being disposed of like Uwe.

Please do something for these guys, before it's too late. I hate to see their last document being published that "they served the Sea Organization for xx amount of years and are granted a 21 year leave of absence before they come back." This is a fact, this is what is written for anybody who dies in the Sea Org and it closes their PC folder, it is the last document. When you "come back" in the next body, you can "continue up the Bridge from where you left off." This "honorable" document is always written by Executive Director Int, Guillome Lesevre. I hate to see these guys dying here in the RPF and I wish they could get proper, professional medical care under no mental and physical stress.

On a similar issue, I wonder why older people are being put through the same level of physical stress as the younger ones. The rule is in the RPF that "you must always run." The former Captain of AOSH ANZO in Sydney is here in the RPF, her name is Elaine Allen. She's about 60 years old and is

expected to work all the same hours. She has complained of aches and pains in her hands from the hard physical work. The pain is so bad that she has a hard time writing, typing and auditing which makes it even more difficult to get through the RPF training program. Oh! by the way, another rule for RPFers is that we cannot take any elevators. The showers are located on the 6th and 7th floor for the RPF in the big blue building. We take a shower every day, and I don't want to calculate how many times I have run up and down those stairs over the years... There are a few people that have bad physical problems who get special permission by the RPF I/C to take the elevator, but that's very few. Most of Elaine's family is in the Sea Org and her son is working at OSA International in Hollywood. Another guy named Henry Woodruff actually made it out of here alive earlier this year. He was over 60, but very healthy and strong. However, what I didn't understand about his situation was that he had to wait for OVER 6 MONTHS to be able to leave. He had a "Committee of Evidence" that had to get approved before he could leave, then he had to wait some more months for his $500 severance pay. He was in the RPF's RPF for over 6 months, doing physical work in the basement with the other guys for 10 hours a day - AT THE AGE OF 60!! I'm sure he caught up with the "real world" when he was finally allowed to leave. I don't know if he just got Fitness Boarded out or if he got SP declared.

There are also a bunch of kids here that are under age. One that graduated is Cameron Allsop. He was at the International Ranch for the kids, and when he was about 14 or so, he fooled around with some girls or whatever and got himself RPFed for out 2D. (Pretty normal for a boy that age to be interested in girls as I recall, but not in the sea org!!) When he arrived in the RPF he could barely read, due to his very low education level. It took him about 4-5 years to get through the program and he finally graduated with his twin Eric Smith. Eric is back at CC Int as a security guard and Cameron is working at ASHO Day. They are both about 18 or 20 now. It's common that teenagers in the Sea Org get curious about sex, and not being allowed to explore mother nature, they "do it anyway" and find themselves on the RPF. These Sea Org kids grow up seeing there parents once a day for an hour at most and often barely ever see them at all. How do you start a relationship or a marriage, not being allowed to explore and enjoy what has been "the birds and the bees" on this planet since Man developed? There is a frantic control of the "2nd Dynamic" which is called the "family or sex dynamic." If you want to look it up somewhere else, LRH explains what the "8 Dynamics" are. I've seen it's a common thing that young Sea Org members get married just to be able to "stick to the rules and still experience sex." Then if it doesn't work out, a divorce follows shortly after. There IS NO FAMILY LIFE in the Sea Org and what is there is frantically controlled. I think the above should give you an idea of what some members are going through. I hate to admit to this, but I have spent many hours "recruiting Sea Org members" over the years before I came to the RPF. Any recruiter will paint up a story how good it is and "it will all work out once you are a dedicated Sea Org Member." I guess these newsletters should not be mistaken for "Recruitment letters"!! Or what do you say? Come and join me! The RPF is ONLY for Sea Org members and it's FREE! All they want is your mind, your soul, your life and your next billion years.

Hello out there in the real world...

I have a friend who recently "blew" or in other words was smart enough to figure out how to get out of this rat hole! Her name is Mariette Lindstein and I knew her for years from Gold. She was a very high executive for many years and was assigned to the RPF for some reason. I never knew why and she wouldn't tell me here in the RPF. She did tell me however that she had divorced her husband Billy Lindstein, and that he is now the CO CLO EUS, in New York. They also have a son, and I believe that he is still at INT. He must be around 18-20 years old.

When Mariette arrived here, she must have planned to blow from the first day she arrived. She brought very few personal belongings, and all she left behind were a few small boxes, which contained only clothes. (Most RPFers bring all their worldly possessions with them, handling all that mest and storing it is another story I hope I can tell you about sometime) She must have kept her ID cards and passport, I think maybe she told them she lost them instead of turning them in. Wish I would have thought of that! Both Billy and Mariette are from Sweden and maybe she went back home? When she was uplines she told me that she was from a city called Halmstad (correctly spelled)? and if she went to Sweden she would probably be there, maybe with her parents? She was in the Sea Org for over 20 years, had no family in the US and I doubt that she had any non-scientology friends.

Mariette had several high posts and was in RTC. For a while she was the AVC I/C Int, Authorization and Verification Correction In Charge International. This post approves new programs and a lot of other things that are then implemented down the command channels through CMO and Int Exec Strata. She got busted and ended up at GOLD. Got busted again and got RPFed! When she blew the RPF here in May/June this year, it was a "flap" of magnitude. You can't believe the search team that is put together to find a person that blows, especially one who has such high inside information. If she has any way of speaking up she would probably be able to tell what DM's [David Miscavige] favorite lunch is or what he has on his desk. Put it this way — she knows "too much"!!! The night she took off, a search team of about 10 people from the RPF itself (the trusted ones that are "moving on the program"), the RPF I/C himself and a bunch of PAC security guards where searching the streets of LA in vain! The RPFers where stationed at the Metro Union station around the clock, in hopes of seeing and catching her (and of course to guard each other!)

By the way, the RPF people sent out on these searches had little or no money for food, and came back starving and deprived of sleep for 24 hours or more! People went to LAX, to the beach and other local parks, anywhere that someone might go to hide or to "destimulate" before coming back. Well, ladies and gentlemen, I hereby happily announce to you that I think SHE MADE IT AND GOT

AWAY!! Of course she knew that she would be "SP declared" automatically and obviously didn't give a shit! However I never saw an SP Declare on her posted on the notice board which is kind of odd, but I am sure there are a lot of things we never find out about in the RPF.

At this point I don't give a shit if they declare me too, I just don't want to go through months and years of com-evs, sec checks, "baby watch" and other BS. I don't know how the other RPFers feel because we are not allowed to talk about it, if you said a word to anyone they would have to report you, even if they didn't, you'd both get busted on the next sec check! And I can see that a lot of people are really taking this seriously and truly want to get back on post. But for some reason nearly everyone is having trouble with the "final assessment" that I mentioned earlier in Newsletter #4, as most guys do have disagreements, etc., with INT Management. The way it's shoved back in our faces is "you missed withholds on your twin earlier or you have out-tech on your twin — that's why you can't get a clean assessment!" Gee, I wonder why that is???? (HAHA) Anyway, I sure hope Mariette is in good health, happy and busy creating a new life. If this message would ever reach her, let her know that I'm still her friend and look forward to the day when I'll be able to catch up with her.

The RPF Insider Newsletter #4	The RPF Insider Newsletter #9	The RPF Insider writes to Collin Powell
The RPF Insider Newsletter #5	The RPF Insider Newsletter #10	

Here are some additional names that should have been in Newsletter #1. I'm sure you will remember some of these names if you have any connections or friends who are in Int management. Forgive me if I forgot some, I think I got most of them...

Here's the list complementing the one in newsletter # 1:

Paul Anderson - was Senior HAS Int, arrived 2003 or 04.

Phil Anderson - Exec from GOLD over Manufacturing and Delivery, arrived in the RPF in 2004. Was posted earlier at WDC PUBS, part of RTC.

Jason Bennick - Formerly CO (Commanding Officer) GOLD, RPFed in 2004. Has years of working directly for COB, and years of instances of abuses from DM himself. Wonder why DM got rid of another CO GOLD with such humiliation? Maybe Jason couldn't be manipulated anymore and also had to be disposed of?

Susy Bennick - Also from GOLD, RPFed in 2004 with her husband. Susy was the one who transcribed all the LRH advices on the comm lines to and from LRH during the early and mid 80's, basically handled ALL of the final years of LRH communication traffic.

Sarah Briggs - from GOLD, RPFed 2004. Worked in LRH Archives for years, putting the materials together for the new book releases.

Reggie Caldwell - Spent several years on the RPF, graduated 2002 or 03 and is back on post as the Medical Liaison Officer (MLO) for the staff in the HGB building in Hollywood.

Derek Cusworth - RPFed in 2004 and routed out shortly after.

Kenny Davies - graduated the RPF in1999. Back on post as a Cramming Officer in the Continental Training Org WUS (West US) in PAC. (Pacific Area Command)

Chip Deichman - arrived from GOLD in 2004. Left, either with a "probational" SP declare or an official declare. This was however not posted or made known.

Rachel Donohue - Arrived on the RPF from CMO Int in 2003. Old-timer in the Sea Org. Has been around since the time when LRH was on the ship Apollo. She's from England.

Wayne Furness - Arrived 2003. Was from middle management in Hollywood.

Josh Gilbert - Arrived from GOLD in 2004 and left a couple of months later. His father is still uplines. Dad tried to get him to do the RPF program but Josh finally routed out or was offloaded. Possibly probationally SP declared. Those who come from the Int Base and have important information are handled in this way for imagined threats or dangers against the church. They have to sign about 15 to 20 pages of "gag" agreements.

Marie-Alice Heinzel - Was on the RPF for years. Her last twin was Ed Parkins. They both graduated in 2004 and went back on post. She was from one of the networks and is probably back in the HGB building. Mark Hooper - Arrived 2003, from ABLE Int. Received a Fitness Board turndown 2004.

Ted Karbowski - Arrived from GOLD 2004, did not make it on the RPF program and routed out or was offloaded and went to his mothers place in Florida, not far from Flag.

Sue Lerner (Thompson) - added to this list with her former married name. From OSA Int, previously from DC Org. Arrived to the RPF around 2000 or earlier. Ex-husband Eddie was a reg in DC. I don't know what happened to her kids, but I know they haven't seen their mom in quite a while. She is around 50.

Mark Lizer - Was an exec over Call-In at FSO for many years. Ended up being the ED of Hamburg org in late 90ies, which was a disaster. He was RPFed for this in 2003 retroactively. Mark has diabetes and is having a very hard time physically to get through the program. He is also in his 50s.

Gil Llewellyn - From GOLD, arrived here in 2003. He has decided to leave several times and keeps changing his mind. Back and forth doing the program or not. His wife was RPFed too and for some reason she was sent to the RPF at Flag, to keep them separated.

Jesse Magnusson - arrived from GOLD in 2004.

Birdie Magnusson - arrived from GOLD with her husband in 2004.

Malcolm McClintock - Came from AOSH ANZO in 2003. Was a Registrar there.

Miles Mellor - Was on post as the Establishment Officer Int, in the Int Exec Strata, routed out back in 1999.

Scott Musselman - from GOLD, arrived to the RPF in 2004.

Kathy Ondreika - from CMO Int, arrived in 2003.

Tom Ondreika - Kathy's husband, arrived in 2004, also from CMO Int.

Ed Parkins - from OSA Int, graduated the RPF in 2004 and went back on post.

Steve Perrin - Never arrived to the RPF but blew directly from the Int base. Worked in the Int Landlord Office late 90's. He blew and got SP declared. He's a professional building contractor and did a lot of work on the Super Power building at Flag. He did his A-E steps and came back on staff 1-2 years ago. He's OT VIII and is now working in AOLA. His wife Peggy refused to join the Sea Org so they got divorced years ago.

Marco Rosenstein - Arrived 2004 from management in the HGB building. Computer expert and knows a lot about the internet and was dealing with this for the church, which is what got him in trouble.

Diana Runyon - from New York. Was staff in CLO EUS. A 16 year old girl, she did not make it on the RPF. Both parents are in the Sea Org. The mother is from the INT Finance Office, and was very concerned. Diana was probably raised in the Sea Org and routed out 2004.

Francisco Sanz Polo - from GOLD, arrived 2004.

Sasha Stuckenbrock - Teenage boy from Int, about 16-18 years old. Did not make it on the RPF and routed out in 2001 or 02. His brother is Uwe Stuckenbrock who is bound to a wheel chair and has MS.

Tom Supak - Was on the RPF for many years. He had a "trio-ship" with Reggie Caldwell and Carlos Torres. All 3 graduated in 2003. Tom went back to Freewinds where his wife is the Senior C/S and a Class XII auditor. Tom and Reggie are both about 60 years old.

Carlos Torres - Graduated the RPF with Tom and Reggie in 2003. Went back to the Universe Corps where his wife Sylvia is working. Both are OT V and Class IX auditors.

Richard Welch - Came from the Int Finance Office 2003.

Wheelis Eric (not Alex) - added to this list from Newsletter #1, to correct his name. It's Eric and not Alex. He graduated in 2003 and went on post in the New World Corps, the organization that is recruiting and training auditors for the new Super Power building at Flag. He came from GOLD. His wife was Maj who got SP declared in 2004 and went back to Copenhagen. They must be divorced by now.

Lee Willett - was on the RPF for years, graduated in 1999 with Kenny Davies. When Lee was at GOLD she blew several times but came back each time. She has a daughter with her ex-husband Steve Willett. The daughter is working at the Sandcastle at Flag. Lee went back on post but blew later and got SP declared 2001. Steve Willett was another recent CO GOLD who also got busted. The 3rd or 4th one to have that post who was RPFed in short order. He's now here in the PAC Renovations Org, with his remarried wife from CMO Int. She is working in the galley!

Joanne Young - arrived from CMO Int 2003.

I'm writing this down straight from my memory, having been around staff from GOLD and Int. I have no access to any lists or other information sources right now. I'm sure there are more names I missed. They might come to mind later. Quite a few staff from Int have come down to the PAC RPF and left right away, so I never got the whole story but I wonder what happened to them.

Additionally; **Mariette Lindstein** who blew the RPF in 2004 and got SP declared; she was previously on the RPF in the late 90's and her twin was Ray Mitoff. He's currently the Senior C/S International. One would think that the top technical person on the planet should be able to get a product on his twin. Guess he missed some withholds on her or she got fed up with DM and his regime.

John Aczel was on the original list in NewsLetter #1, but I thought I should add to what I know about his bad experience and personal encounter with David Miscaviage. DM spit in John's face in public, supposedly complying with an LRH order. Is that "standard tech" for handling one's fellow

workers and juniors? I don't think so... No wonder people are disagreeing and leaving the Int base in droves!!! John has been on the RPF for 6-7 years. He has been around since the days of LRH at Saint Hill, and he's getting up in his 60's.

Well, where are all these people now? Some, but not many went back on post, MANY have routed out after receiving a "Fitness Board" turndown. Some left with an SP declare, some with a "probational SP declare" (which I have not yet found any policy or reference about; another new made up "Miscaviage" policy?) and some left with a beefy program to be allowed to come back in the Sea Org.

This usually consist of paying your "Freeloader Bill", which is all the courses and auditing that you have taken with a no-charge invoice, usually things that you are required to do to get the training needed to be able to perform your duties skilfully. The bill for any old-timer could be anything from $25,000 or $30,000 to as much as over $100,000. Anybody in for less than 5 years, the bill could be about $10,000 or more, depending on how many courses and how much "service" or auditing you have received. SEC Checks anyone? Lucky for us we don't have to pay anything for the RPF program as it's delivered on a twin ship basis.

It's considered an honor to be given the chance to redeem oneself and "come clean". The exchange for the food and the over crowded spaces is 8 or 10 hours a day of doing renovations and other hard work. In addition to paying your bill, usually a great long list of courses are assigned, once you finish A to E and are back in "good standing" as a public. These are courses addressing the assumed cause of your difficulties and problems you had, so they have to be studied and paid for AGAIN. Examples are the PTS/SP course, ethics courses, administrative courses and often to train up as an auditor to a Class IV or higher level. Some are even assigned to do OT levels. The price of all this training easily goes up to $40,000 or more and MUCH more if auditing is required! Then, if you jump through all the hoops and want to re-join the Sea Org, you have to route back in through the RPF!!

People do it... but none for me, thanks! I wonder sometimes where all the big money is going, because the RPF used to have a lot of real projects to work on, but there must be some funding problems. Look at the big blue main building, the big cross with a gutted top. Looks horrible, and has been incomplete for years. The RPF built the testing center down in Hollywood in 2001 and it was opened for a while. Then some plans changed and they wanted to expand the testing center in the Hollywood Inn building with more courses and spaces for students. This required a better foundation, so the RPF had to gut out the entire space that we had already fully renovated, wasted probably $100,000 and at least 6 months of work with many man hours. Then we poured concrete in the basement to make it earth quake safe. As far as I know, it's still not funded and the temporary place further down the street is still used instead.

We are not allowed to go off the base to work anymore on such projects, maybe in an attempt to keep us busy and hide us away in the complex? We are mostly working in the mill, building furniture and renovating things inside the building and in the basement. Moving folders and other "big" projects. If you have had a chance to go to the San Francisco organization, all the nice furniture, the big reception desk, etc., was built by the PAC RPF. Even the big reception desk for the Hamburg org in Germany was built by us and shipped over there!! Looks like the strategy is to make people work in the RPF or in the Renovations organization, to "build new orgs."

By the way, if you would have the inclination to go and visit the HQ where most of these people came from; called GOLD or the Int base, here's a tip on how you can find it. You can look up Hemet on the map, southeast of LA in Riverside County and just go there. Otherwise there is an inside phrase called "the run." This is a twice daily mail shuttle that goes between the HGB in Hollywood to the Int base at Hemet. Just follow the van that leaves around 11 am and again around dinner time. It leaves from Ivar, the side street crossing Hollywood Blvd. The van pulls into the parking lot across the street

behind the black bar gate. Boxes and packages are loaded up from "external communications" located just inside the doors in the HGB building, across the street from the black gate. Passengers sometimes wait around in the parking lot to get a ride on "the run," to go to the base. The van pulls out onto the freeway towards Riverside. When you get to the base you will find "Golden Era Productions," but this is also the base where INT Management is located. I'm concerned about the working conditions for the people that are still at INT now. So many people have left, blown or been RPFed. The staff still there has to get the work done with much fewer people. The living conditions have probably gotten a lot worse, and I imagine COBs attitude has gotten a lot worse too. I am glad I am not there, though I'm still concerned about my old friends and wonder if I will ever be able to see them again...

The RPF "Insider"

Note from "Insiders" friend: the RPF does have computers, but no access to the internet. Or I should say DID have computers, thanks to the Newsletters and all of you reading and acting on them, I doubt if anyone in the SO has been allowed to touch a computer in quite a while. I imagine every computer is being taken apart and scoured for info... too little, too late. All the data is already safely out, and hopefully a lot more people will come forward soon to verify the truth in these Newsletters. Everyone has the right to practice whatever religion they choose but this insane abuse has got to stop! Imagine a "Cleared Planet" with DM in charge. Thanks to all who have helped and are helping to prevent this nightmare. This is True, RPFIF.

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

Besnard, Jean Yves -- from France. J-Y arrived to the PAC RPF with 30-40 other Int staff from uplines in early 2004. Prior to this he had been assigned to the RPF at GOLD. He was one of the top technical guys on the HEM line for many years. (Hubbard E-meter Manufacturing at GOLD, where all e-meters are produced, assembled and serviced). He's an electronic genius and was responsible for all the e-meters that were turned out on the assembly line, and each one had to be a perfect product, because all hell would break loose if they didn't pass an inspection.

When he first arrived to the PAC RPF he had to deal with some family situations that he was never able to get straightened out. His kid, who also was at Int, ended up routing out as a teenager and there was family misery because of no time for family life etc. The kid left and J-Y was ordered to "handle or disconnect", which is the "standard PTS handling". When J-Y arrived, he spent a lot of time with the ethics officer trying to get this situation under control, but apparently the kid was in some major protest of the family situation and caused a lot of trouble.

I believe his kid was raised at the "Int Ranch", where most of the kids end up, unsupervised and with poor education. One example of that is Cameron Allsop, who was born in the Sea Org and could barely read when he ended up in the RPF as a teenager. Both of Cameron's parents are still at GOLD. It took him about 6 years or more to get the through the RPF program and he had to learn how to read and study before he could even start! J-Y had already had to divorce his wife at GOLD and now he was responsible for their child, still being a minor. J-Y's family life distracted him quite a bit, to the point that he was getting in trouble in his work, so the solution was to "get rid of him", because he couldn't handle the kid that caused trouble on the lines at GOLD and Int. Despite the many attempts that he did make, it was to no avail and he ended up on the RPF. The viewpoint is basically that "you are off purpose if you want to spend time handling your family and neglecting your duty and post". It's already a known fact that "children are a distraction to their parents in the Sea Org" and if they cause too much trouble or are forced to be in the Sea Org with the parents, and then create trouble in their teens, dramatizing their protest, the family is basically gotten rid of, RPFed or routed out.

He tried to take care of his children, but he wasn't allowed to do this properly as there was no agreement from those in charge, like the RPF I/C Int Chris Guider. Instead he was hammered and pounded that he's "not with the program, and you need to decide to get back on post, or you will be SP declared and routed out!" I don't know what Chris Guider told him when he came down to do one of his routine invalidative handlings of Int RPFers, but J-Y got fed up with the situation and decided to handle his family situation and consequently he got SP declared. He had a lot of personal belongings with him when he came down from GOLD. Over the years he had invested his hard earned money in musical instruments and other expensive electronic gear that was worth at least $10,000 if not more. This included guitars, a saxophone, loudspeakers, a mountain bike, lots of CDs

and you name it. When he was handed his SP declare he was happy to finally be able to leave, but he never had a chance to arrange to pick all his stuff up. He left it all behind in his rush to get out of there. Maybe he was so relieved to get out of there that it didn't matter to him??

He wasn't the only one who was forced to get rid of or abandon their personal belongings. When there was a massive evolution of GOLD staff that had been RPFed uplines and then all sent down to PAC the same week, it created massive confusion with all the belongings that they all brought with them. Imagine 40 people's life belongings, everything they own and several were married couples, like the Hodens, the Magnussons and the Epsteins. It was all was packed in a rush and shoved into trucks and sent down with them. Sometimes even the ethics officers at GOLD were packing RPFers belongings, just to speed up the process to get them all out of there! It was horrible to watch such ousting of my own friends! All this stuff filled a huge room that was empty and not renovated, hundreds of square feet. It is where all the RPF has their musters in the west wing of Big Blue towards Catalina Street on the 1st floor, where you see all the white plastic in front of the windows. (The living space is on the 2nd floor right above it.) We were not told why to put that plastic up, but it's obvious, not to draw so much attention in an attempt to hide 200 people!!

When the Int execs come down to PAC, they always come through the entrance at Catalina, into the "horse shoe" driveway, and it was quite easy to find out when DM was on the base, as we were told "stay away from the windows" and "Catalina street is OFF LIMITS UNTIL FURTHER NOTICE" with notes posted on the exit doors. I always wondered why it would be such a big deal "if David saw the RPF or any specific one from Int"! Isn't he somewhere on the line approving of getting rid of all his staff at GOLD and Int? Doesn't he know that this is the major disposal line of "disobedient and disaffected, disagreeing staff"? I watched the numbers of GOLD staff shrink slowly but surely over the years, and fewer and fewer new ones can manage to make it through the "Int Clearance lines". The staff that is left there now has to work harder and harder, with less and less staff. Who is going to make all those films and CDs soon? They are already working nightshifts and at new product release evolutions, some guys don't even sleep for 2-3 days, until they collapse! The "all-hands activities" are all done in addition to your normal post routines, and you get killed either way -- if the release doesn't come off successfully or if your own stats are down! So it's just a matter of time before the whole place collapses in protest or overwhelm! In order to make it through the approval lines to Int and pass security, you basically have to be a saint! Preferably a virgin with perfect Sunday school attendance all their life! The guys that are working around the clock trying to get "qualified" staff up to Int are doing a lot of work in vain and are pulling their hair out in the search of "Int qualified staff". The Int PPO (Personnel Procurement Officer) has a frequent post turn over, because it's a fatal and impossible challenge to do the end of endless "debug of the Int recruitment lines". Soon there are only going to be a few top execs barking out orders all over the place -- only to find out that the ones they are barking at are already dead or gone!

When all these former GOLD staff were sent down from the Int RPF all at once, it presented a problem -- there was simply no place to put all their belongings. The space allocated for the RPF has shrunk to only 2 of the 5 big orange metal containers lined up in the very back that you can see in the "Catalina parking lot". (Inside this is called the "Cat lot".) The street is Catalina, behind the big blue building. The RPF I/C was often preaching and ordering everyone to "dekludge" (meaning throw away as much as you can), because we can not store it all. Right next to the metal containers is a huge dumpster and this was filled up over and over with stuff that people had saved and wanted to keep. We were also made to feel guilty "to have so many belongings" as the containers are rented and have to be paid for every month! When you really look into it, each person only had 5-10 feet of shelving space, 2 containers is not much when you consider the fact that they are holding over 200 people's life belongings.

When they left GOLD they had to do the same clean-out, obviously one would not be allowed to bring

everything when moving under these conditions, so they had already been forced to throw out all but the most valuable stuff people really wanted to keep. Then once they came down to LA, they were told that "it's all garbage" and "you don't need this anyway" and "why do you keep this stuff". This process was going on for MONTHS and we were squeezing in all these belongings, repacking them to utilize all the space, building shelving and dragging it out and repacking it and putting it back in. In the middle of the summer in 100 degrees! Whole teams of RPFers were busy doing this over and over and it was kind of a "relief" for the others when someone routed out, as they got rid of a bunch of stuff!! How low on a scale of purpose can one sink?

There were many people that routed out and didn't even bother to pick up their belongings. Some arranged to have stuff shipped, but if the expense was too much, it was just left sitting here; waiting until it got so old that someone sooner or later decides to get rid of it and trash it. On the RPF you are not allowed to have anything more than the absolutely necessary things. This must fit into a small locker about the size of 1 x 2 feet. A small amount of hygiene supplies and a few clothes fit in there. Inspections are done over and over in the rooms and RPFers having "too many personal belongings" are required to get rid of things as it simply doesn't fit in the rooms that have 20-50 people in them!

In the process of moving all the stuff in and out of the storage bins when people arrive or leave, (and there were very heavy ones, with big boxes of books etc), many of the boxes get smashed up. Jean-Yves' equipment was shoved in and out, many times left sitting in the middle of the aisle, and each time something got smashed or broken a bit, his loudspeakers to the stereo etc. All his personal belongings from his bicycle to clothes and the above mentioned equipment was left behind. He might be living in the LA area or maybe went to see his kids who were in another state. I hope he decides to come and get his stuff before somebody decides to throw it out as being deserted.

THE RPF PROGRAM — A SUCCESS OR A FAILURE?

Due to Scientology's need for statistics, here's the next newsletter in the series. We have recently posted the sad and heart-breaking stories of some recent RPF members. These stories are being posted serially as RPF Newsletter #9 and will eventually include everyone on the original list from newsletter #1. Names with an * by them on the list below are stories that have already been told. In other words — there are many more stories to come!

To those concerned about privacy issues for current or ex Scientology members, we are not sure what your objective is. Are you suggesting that the fact that someone was involved with Scientology is enough to ruin their lives once they get out? Are you forgetting that many of these people have spent most if not all of their lives in the "elite" Sea Organization, truly believing that they were "saving the planet", and that all of our sacrifices (i.e.; abandoning families and children, working like dogs, living like pigs, not daring to think our own thoughts, submitting to the whims of management with nary a complaint and showing up for "muster" several times a day) were worthwhile? As a Sea Org ex myself, and knowing many others, I assure you we looked down on not only "wogs", we also looked down on lower org staff, public Scientologists and anyone else who was not in the Sea Org. We were PROUD of ourselves! Even the lowliest RPFers "know" that they are among the most enlightened and valuable beings on Earth and that scraping paint off stairs for 78 hours a week in the RPF is better than being a "wog".

Being offloaded and declared SP is a major shock after a lifetime of such devoted service. Even harder is to find out you were lied to and used. All the "hip, hip, hooray - big wins" and "expansion" were a pack of lies. No one in the wog world heard or cares anything about it. Next, if you are lucky, you find out there are people who have been through it, and are willing to help you. The real world is actually a very nice place, and most of us feel like every day is a holiday once we wake up from the cult mind control. No one is going to tap us on the shoulder and take us to HCO for another round of "sec checks". We can go where we want to, eat what we want to, sleep when we want to, work when want to, talk to anyone we want to, read and study and watch what we want to, etc. This is a really big deal when you have spent years having your very slightest thoughts examined and punished, and your every moment accounted for.

Once you realize what a gullible, idiot, asshole you have been by believing in Scientology and hurting everyone who really cared about you, I guess you could wish to erase the past and hide your involvement with Scientology. But IMHO, that is not going to help you. You will still know what you did, and you will still know that your friends, family and fellow Sea Org members are still caught in the trap. Maybe some will be mad at us for telling their stories, but I bet once they are free of the

fantasy world that LRH created, they will appreciate having some friends who understand. The only reason I can imagine for keeping quiet is so that people coming out have nowhere else to turn and will be able to get "good" jobs so they can pay off their "freeloader" debts in an attempt to get back in "good standing" with Scientology. In other words, waste the rest of their lives.

The attached RPF list was gone through in detail and each RPF member was placed in one of four categories and the percentages calculated.

SP Declared	4 %
Probational SP declared or left the Sea Org	31 %
Last known still to be on the RPF	43 %
Back on post in the Sea Org:	22 %

The statistics speak for themselves! Out of 225 recent RPF members, 78% have failed and only 22% made it back to post. Is this program working at all? I would say it's time to do an investigation with an evaluation and a program to handle! There must be an SP or an infiltrator on the lines! Or could it be that the RPF really is the "old elephant graveyard" where the old, sick, useless and disillusioned Sea Org members go to die or be offloaded? Who is the "who" responsible for so many newly declared "SPs" having been allowed to hold so many important posts for all these years? All of the RPF Flag Orders were recently "revised and updated" from the original LRH orders. Who gave the final approval for these revisions in LRH's absence? It is RTC's job to "Keep Scientology Working" — yet this new and improved version of the RPF is NOT working!

The above facts and figures are just from the PAC RPF in Los Angeles. I am sure a similar compilation of facts in any of the other RPFs were done, the same percentages would most likely come up over the last few years. Only Scientology management knows how many Sea Org members there are, and believe me they DO know, every Sea Org member has his nose counted several times a day, and is required to account for his every move. Another interesting batch of statistics would include the average age of current Sea Org members, how many were raised in the Sea Org, how many graduated from high school, how many old timers are left, how many have children they never see, how many of those children are on ADC, how many pay child support, how many divorces, how many abortions, how many have life insurance, retirement plans, medical insurance, dental insurance, or even savings accounts. How many are illegally in the US, how many have missed their family's funerals, family reunions, weddings, birthdays, holidays, etc. All so they can help "clear the planet" by scraping paint off cement.

A Christmas greeting from the RPF.

Have you ever wondered what it is like celebrating Christmas in the RPF? Well, it is not something that you would think could exist in the US today, especially not in a "church." It's a total denial of anything associated with Christmas. You are robbed of all of your time and you aren't allowed to have anything to do with Christmas at all!

In all the years I spent on the RPF, Christmas was always suppressed and made nothing of, because there is NOTHING to enjoy. Every year we all talked about it in a way of "well, next Christmas we will not be here etc.", and tried to forget about it, just hoping that it would soon be over. Then next Christmas comes and you are still here!! Year after year, old pleasurable memories fade away and one becomes lost to any of the traditional things that Christmas usually brings. The joy of giving a present, writing Christmas cards to your friends and loved ones, shopping, seeing a movie, eating some good treats, cookies, cheese, nuts, eggnog etc. is denied. The dream is always pushed, "graduate so you can enjoy Christmas"; meanwhile you are lower than a rat. If you have any relatives or a spouse left who still care about you and know where you are, they could drop off a bag of goodies for you, which only accentuates your loneliness, and creates worse feelings for those who never get anything anymore. The RPF I/C has to read and approve every letter. Many times his lines are so overloaded with extra traffic that he spends many hours a day just reading all the mail, before he can allow it in or out. He's supposed to make sure there is no "entheta" or any influences that would disturb Scientology's image. This went to such an extreme one Christmas that many letters were STOPPED because "they were too long" and then he questioned the group about "how is it possible to write such long letters on your RPF schedule?" I saw many letters sitting in the RPF Ethics Office that were rejected and even if they were mailed out, it often created real upsets among family and friends as they could not understand why these letters were dated weeks or months earlier! A couple of years ago, the RPF I/C PAC, Chris Meyers, spoke to the 200 or so RPFers and made it clear that he did not have time to spend all day reading mail and checking out presents and disabused the group of spending any time at all writing letters or bothering to try to send anything to friends and family. Denial and disapproval of anything to do with Christmas by this scrooge made us all even more miserable knowing our families and especially children would not understand!

So what DID we get? 10 MINUTES EXTRA TO EAT OUR "CHRISTMAS DINNER!"

This "extra" time is spent opening presents that friends and family sent in that made it past security. In a cheesy way the presents are piled up by the leftover crew dining room Christmas tree and officially handed out in front of everyone. If your family didn't send anything, you sat and looked at everybody else opening theirs. If you had a friend in the RPF or a good twin you might be able to get a small treat, which was all you could hope for. After the "extra 10 minutes" it was back to the

normal routines of a full schedule of cleaning, hard work and study from 7.00 am to 11.00 pm. Not a minute extra to do anything that is expected of one's social behavior towards family and friends. The constant indoctrination by the RPF I/C is "what better way is there to spend Christmas than in session getting sec checked so you can graduate faster?" If you wanted to call your family, you first had to have it pre-approved by the RPF I/C in writing, which sometimes took days to get. Writing Christmas cards is only approved to your closest family and on your own time, if you can manage to pay for them yourself with your $5/week. Not to mention the hurdle of actually finding a way to purchase them, since you are not allowed off base. Just to manage to get the stamps was a challenge itself, and if you missed the one organized purchase run, you lost the chance and your cards didn't go out! If you were extremely lucky you managed to find some other RPFer who was willing to sell some left over stamps. You have 20 minutes for lunch and 20 minutes for dinner, so after having to stand in a 200 man food line for your slop, you essentially have only 10 minutes to EAT. That is the extent of your "free time."

While the rest of the staff are having parties and splurging on extra food and treats, the RPF get nothing of it and instead have to clean up the mess after staff meals and the traditional "Bosun's party" and "Beer and cheese party". The crew pigs out on all the Christmas treats and many get drunk and just leave behind a mess for the RPF to clean up. The only thought running through your head is "one day I will be out of here and enjoy some of this, maybe!"

After Christmas, the real fun begins for the RPF. If you have ever attended any of the Scientology New Years events, you have seen the pompous, huge, rich looking, elaborate and enormous designs of the stage and the backdrops. How do you think these elaborate, heavy and intricate columns with gold paint, shadows and detailing are made? You guessed it! THE RPF!! THOUSANDS of man hours!! The goal that Golden Era Productions has is that "each year it has to be more and more impressive and better looking". It's easy to sit at a computer and dream it all up, but someone on the ground has to put it all together! About 4-6 weeks before New Years, mid November, the work is started to make these huge columns of Styrofoam and resin. The many pieces are constructed and built separately and finally come together as a huge puzzle which is later transported in big trucks to the Shrine auditorium in Los Angeles. By the way, they are so huge and are such an investment that most of the structure is used from year to year and stored in the basement of the Shrine. Each year the big pieces are pulled out of storage and back to the base to be fixed up and redesigned. Scientology is paying tens of thousands of dollars just to store these big pieces of PR fluff there every year. To host an event it costs something like $150,000 - $200,000 and if you want to start earlier on the set ups using the Union's work time, it's about $50,000 a day. So the solution has been that the RPF is used for the prep work and everything is prepared in advance, to minimize the union costs. Usually, the day of the event EVERYTHING is set up in a blitz fashion with the entire RPF starting early in the am. Could it be that the RPF is kept full of people to keep the costs down and pull off the big events? Without the thousands of man hours on the ground making that stage - there simply would not be any event! The number of staff at GOLD is declining and it would be an impossible task to have the org staff in PAC do this kind of work on an all-hands basis in addition to their normal posts. Who would be there to "get the stats up" and make sure the public is confirmed to come to the event?

One thing that is always discussed and frowned upon when the final set ups are done at the Shrine is the "team work" with the Union. In order to be able to do the set ups the Union must be there to organize and orchestrate the work. The huge thousand pound stage props are pulled up in the ceiling with cranes and machines and they don't want a bunch of RPFers running around, being at risk to get hurt. What aggravates the working conditions every time is that the RPF is not allowed to continue work while the Union guys are taking their breaks. They do take coffee breaks and lunch breaks like human people, and while they are getting their nourishment to continue the hard work, THE RPF IS WAITING! We have to "look busy" while they are eating. We don't get any food, but are put on cleanup jobs and "chicken pick" the parking lot and other such activities. I wonder what the Union

guys really think about having 150 RPFers hanging around and waiting for them to finish their lunch! The Union workers are always impressed with the speed and the hard work the RPF is performing, but little do they know about the real reason why we put up with the working conditions!

The Shrine has been the New Years event place for Scientology of many years in a row and the place is booked and reserved at the beginning of each year. The execs at Int handling the reservations are practically running a monopoly on the New Years week end. It would be a real "disaster" if the Shrine couldn't be booked as no other hall in the LA area can hold as many people as they hope will show up, except the LA football stadium, although no 10,000 people ever actually show up for this event! All the chairs must be full and give the illusion of "expansion" when the cameras from GOLD sweep over the audience. If it was a bigger hall and had empty seats it would "look bad". That is one of the reasons for the call-in frenzy, to make sure all seats are full. The Shrine seats about 5,000 - 6,000 with the balcony, and did you know that ALL the staff from PAC and from the HGB are there in the audience to fill it in? That is about 2,000 heads counted that are staff! They are supposed to be there, nicely dressed up out of uniform and if more public did come in unexpectedly, the staff would have to give up their seats and go outside to the set up "overflow spaces". So the crew is basically kept around to fill in the gaps if not enough public shows up. The real live event is usually scheduled a couple of days before the 31st, as few public want to show up on the real New Years Eve and the difference in time is used by GOLD to reproduce the events on DVD's and send them out express to every org for their own events. This year New Years Eve falls on a Friday, so we'll see how this is planned out!

By the way, did you know about the "ultimate plan for all the events"? Right next to the Clearwater Super Power building a huge auditorium is planned to be built. It's about 1/4th the size of the SP building and is supposed to go diagonally, South-East, at the block between Franklin Street and Court Street. This huge planned auditorium is the solution for all international events. It's supposed to be "state of the art" standard and in between the yearly scheduled events, it's planned to rent it out to the City of Clearwater for music concerts or similar engagements, to help cover the building expenses. Will we ever see the start of this project? One of the many obstacles that had to be overcome, in order to be allowed to build the SP building was the city requirements for public parking. In some way the block east of the SP building, between S. Garden Ave. and East Ave. South would have to have been secured, where an enormous parking structure is supposed to be constructed. Where else would the "thousands" of parishioners and event-attendees be able to park? The SP building was only approved to be built on the stipulation that enough parking spaces were provided. So MORE DONATIONS ARE NEEDED FOR MORE CONCRETE! And more RPFers to do the work!

Another major operation that you see in Hollywood is the "Winter Wonderland". This set up usually starts the first or second week in December and is run by the LRH PR Office in CMO PAC. There is a huge 48 foot trailer stored away somewhere that contains all the decorations. The set up is next to the staff quarters by the old Hollywood Inn. If you have walked by it looks quite impressive, with the thousands of twinkle lights and the hundreds of Christmas trees built up on ramps, with spotlights everywhere. There is "Santa's house" where children can have their picture taken for a "minor $5.00 fee" with music playing in the background, performances by kids from CC Int and all kinds of wonderful things children dream of, including real snow brought down from the mountains sometimes. Have you ever thought of how MUCH WORK it is to set that place up and WHO IS DOING IT? Yes, you guessed it again! The RPF! Hundreds of long and cold man hours, by RPF teams working every day to put up the huge backdrops with the many logs and poles 60 feet up in the air, a massive wood construction to hold it all up. The regular staff sometimes comes to help out, but it's a fact that it would never be done without the RPF. Is this another reason to keep the slave labor camps going? When Christmas is over, the RPF is there again to do all the work of tearing it all down and packing it all up. I wonder what Santa would think about that? The plan was that the parking lot where the WW set up is would be part of the new "Testing Center". However, the building is not

done yet. It has to be earthquake safe all the way up, and that old building from the 1920's was rolling and about to come down in the last big quake. The "temporary" testing center is still there; on the other side of Hollywood Boulevard a couple of blocks down and the RPF is not required to work on that project anymore. Running out of funds? I guess Winter Wonderland will still go on with RPF labor and if the testing center is ever completed with the planned expansion, WW is history or will be relocated to somewhere else.

That's Christmas in the RPF, but how does it look from the top of the Org Board? Having been at and seen the spectrum from the top of Int management to the bottom of the local orgs, it's quite a shocking difference! The public has no idea of the difference and they probably believe that Christmas is celebrated and enjoyed by all. The Int Execs are definitely getting more than their share of the goodies. It's usually in form of big overfull baskets of goodies and treats that cost hundreds of dollars. "Baskets" are a "big thing" and every entity like CMO PAC or any other CMO or RTC unit around the world show their "respect and gratitude" towards DM in form of "baskets" and incredibly expensive luxury items. Money collections are done by staff in each org and each staff member is more or less obliged to pay and donate for the purchase of some fancy gifts to DM. If one does not donate, it's looked down on in scorn, as if you don't approve of him! He gets hundreds of luxury items every year and sometimes it's even paid by the org financial planning to cover it! DM isn't able to enjoy all those goodies himself, so the Int staff around him gets their share too, especially RTC and CMO. Baskets and presents are flooding in from all over the world. Expensive, special and artistically designed and embossed greeting cards are paid for by "donations", in the competition to impress DM and Int Management. The flashy, fake specially designed Christmas cards from DM, the Int exec strata, Author Services and RTC are also sent out every year at ridiculous expense. This is especially offensive when you consider what LRH says about Jesus on the OT levels, and also when you know they were paid for by deluded adherents struggling to pay for the bridge to nowhere!

The Int execs really "work hard" just before Christmas. They must do all they can to flood the orgs with telexes and orders and quotas that have to be met so the stats don't crash over the holidays. Once all the traffic is sent out, there is not much more that can be done from the top, so they take off for a few days, expecting the rest of the world "to get the stats up and make money". Arrangements are usually made for groups of Int Executives to go off skiing, go to the movie theatres, even go to Disneyland or Disneyworld to spend time with their spouse and family or just relax with a good book. The times I was included in these activities I felt really guilty, I knew from years of working in orgs and in the SO how the luxury condos and food and entertainment were paid for. I had a really hard time enjoying myself knowing that staff was NOT having much fun, and knowing I had trained, regged and recruited many Scientologists to disconnect from their families, max out their credit cards, mortgage their homes and go into deep debt they couldn't afford, and here we were blowing their money to celebrate a holiday we didn't even believe in. I wonder if DM feels guilty when he is gambling as a high roller in the casinos with his Hollywood shills. The only time I ever got an LOA (Leave of Absence) to visit family was through Int, most SO don't ever get one. Another thing that always bothered me was that there were 600 to 800 staff at INT who produce exactly nothing in actual products, but get the best food and accommodations and luxuries. They live at the top secret Int base in Hemet, and make up plans and evaluations and programs and targets, and sometimes send out missions, all to pound, pressure and threaten lower orgs to MAKE MORE MONEY! When I was lower org staff, I used to harbor suppressive thoughts about how I would like to see some of those idiots run a class V org! Come to think of it, one of the worst punishments for SO (next to the RPF) IS to be sent to a class IV or V org. Reference the 1986 FO on Children in the Sea Org.

Meanwhile, at the lower levels and in the local orgs where the "real work" has to be done (like actually delivering training and auditing and getting bodies in the shop for regging, etc.), the staff gets to enjoy some small parties and a longer Christmas dinner break and sometimes some time off. Usually a 1/2 day is given to go shopping and the crew takes turns so not everyone leaves at the same time. Only for the "upstats", of course, this is a real trick when the public is busy with the holidays.

The motto is always "get the stats up for LRH for Christmas". You are not going to be down stat or in lower conditions for Christmas are you? Well, if you are, you will not get any time off etc.

You are not planning on spending any time with your parents of relatives for Christmas are you? Any request for time off for such activities is considered to be "off purpose" and one is considered to be PTS and sent to ethics! Almost nobody gets approval to get time off for Christmas, and if a staff member insists, he has to get an approved CSW (Completed Staff Work). You have to have a solution worked out as to who is going to replace you when you are gone. And if it doesn't look like the stats will be up, it won't get approved. Additionally you need to get a sec check to show that you are not planning on blowing, or that you are not PTS and that there are no other reasons why you would like to have a leave of absence. The chances of finding an auditor who can complete this sec check for you is practically nil, so 99% just give up at the thought and spend year after year away from their families, to be more and more alienated from their relatives and are then considered to be "kept hostage" and secluded in a cult. THAT'S why you don't see staff members off with their own families. Everybody would like to, but are afraid to speak up and be a target for instigating an ethics investigation for being "off purpose" and a "threat" to the "stats and the expansion". The thinking is that, if the majority of staff would be given time off for their families, there would be nobody around to run the orgs and get the stats up. Who wants to spend their Christmas on course or getting auditing anyway?? The public are off having Christmas! So the staff are desperately working to "get their stats up", which is the reason multiple phone calls are pressured and ordered, to get the public to come in so they can be beaten over their heads to pay for more services and make more student points or get in session for the hours "to get the stats up for Christmas"!

I will spare you the details of the personal threats from executives to juniors when things aren't pulled off as expected! These are the usual routines that pull any holiday feelings down. Once Christmas day is over, the real craziness and threats kick in! What happens right after Christmas? The New Years event! Management is operating on statistics and the only talk of the town is "event confirms". There's incredible pressure and demand behind getting "the confirms" for the event done, and there are "all-hands" activities in every org to call in the public for this event. The total control mechanism is really dramatized over this, and it gets so bad that staff are often calling public on Christmas Day for the "New Years Event Confirmation". When some public get their 4th or 5th call to "be confirmed" they are usually quite pissed off! The biggest flaps happen if the "confirms" are down. Then those heads are counted over and over in a "stat scrape" to make sure that there are more than last year. This is an important index of "expansion".

The demand for confirms and the constant demand for reports back on what the current numbers are is the only important thing going on in CMO meetings up until the event. If CMO doesn't effectively handle it, the RTC reps step in to do an investigation and find out "WHO" is stopping the expansion lines. It is thought of that any lack of expansion or lack of production has some Suppressive Person or PTS behind it. If the event confirms or attendance is down - heads are rolling! Did you notice that the long term Event I/C PAC left the Sea Org about 1 year ago? Forgot his name right now, but he used to be married to the Captain of AOLA. He used to run the RPF on doing the massive event set-ups, and one day he was gone! He never came to the RPF, but I think he was smart to get the hell out of there. I'm sure he got a big dose of degradation and invalidation on his post and finally he couldn't put up with it anymore.

See anything wrong with this picture? If you feel like it, send a report to RTC and let DM know what you think. http://www.rtc.org/en_US/matters/intro.html.

Sooner or later the real truth will come out and there will be no staff left to make those "confirms" and no RPF there on the ground to put on those fake, glorified, glamorous Miscavige events!

The greed at the top of the org board will catch up with them. The painful truth is filtering down the echelons to every org. All staff planet wide will realize they have wasted a large portion of their lifetimes working for a criminal scam cult ripping people off of their life savings and years of lost time, bankruptcies, ruined lives and broken families. All criminals leave clues behind and DM is no exception. No matter how hard he tries to blame others and cover his own ass, too many people have been victimized and ripped off by him. We will all be standing in line to testify against him and his cronies. I suggest it is time for those still loyal to the cult to do some soul searching and get out before you are the next "WHO" that gets declared SP or RPFed or sent to jail by these "grinches".

Merry Christmas,

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

It's amazing how inefficient and stupid the guys are that are operating in Scientology security and OSA! I'm actually ashamed of having spent a good portion of my best years in the group called the "Sea Organization".

I just can't believe the amount of paranoia that has been created around Katie Holmes and all the efforts OSA are putting in to trying to make sure that she is not going to find out about the real truth about scientology. Tom Cruise and Katie Holmes are making themselves international fools and the more Tom Cruise tries to promote "his success in life is a result of scientology" -- the more the world's public will blame Scientology for his weird behaviors because TC is just a blind, ignorant and deluded fool! The only way he can turn his movie career around would be to quit scientology, but he's in a catch 22 because that would backfire even worse on him. He's being treated like any Sea Org member; he doesn't even have the Internet in his house! He can afford everything he wants and whatever he points at, but he can not look at the Internet? Why? Because he's being told from the top of the criminal "church" and by DM that he better NOT look, because he will go to ethics and he will not be able to continue up the bridge and get the rest of the "OT levels" and his "case" will be stalled.

That is what every Sea Org member is told and why they are so uninformed, deluded and brainwashed, that they don't even want to look at the Internet or accept any help, even when offered. Everyone is afraid to find out, as it just means more interrogations, leading to security checks and being taken off post and possibly be sent to the RPF, where all "disaffected" Sea Org members have "a last chance to redeem themselves".

Well, it's too bad they can't send Tom Cruise to the RPF, but it's just a matter of time how long he can keep his fake TRs going and pretend that "the world one day will accept Scientology". He's so deeply into the mess that he can not ever leave Scientology because then OSA and the rest of DMs money-motivated criminals would pull out his dirty laundry from his "confidential" auditing files and expose his secrets to the world. He does not want all the newspapers to find out what his secrets are! That is the tactic that is being used, and if OSA can not sabotage a dissident's life by exposing their bad past, they "pay them off" to shut up.

That is exactly what I think DM did to the IRS. He didn't "handle them", like he boasted about to all of us on the inside. Scientology investigated, blackmailed and threatened individual IRS members of the Government thoroughly, to the point they had to give in, it seems to me now. You should hear the story insiders are given, compared to the story on the Internet. That is the "IRS Victory???" O'Boy, I just can't wait to see what will happen when this comes back and bites DM and his staff in the ass. The IRS will be back! They are just waiting for the right moment, like many others of us!

How many wives will Tom Cruise go through before he finds one that can "accept" Scientology? I would like to know what Nicole was told to shut her up when they got divorced. And who were the real Sea Org parents of their 2 adopted Sea Org kids? There are many buried lies yet to dig out! What was done to Penelope Cruz so that she wouldn't speak badly about scientology to the press? Let' s see how long it will take before Katie Holmes has had enough -- and then we will hear more lies painted up about why they broke up!

Since I managed to leave after the RPF, I have learned so much in such a short time. The Internet is just an amazing source of information, and there the truth will reveal the true crimes of Scientology. Why some guys are possibly murdered or strangely disappear. "Truth Revealed" is not on OT VIII, where you only find out that you have to Method 9 Word Clear the book "History of Man" and keep auditing those imaginary BTs and Clusters that never existed anywhere other than in LRH's schizophrenic mind. Plus you find out all your past lives were just imagined, too.

I found on the internet what OT VIII is all about from Maria Pia Gardini, who donated millions of dollars and was a highly trained Sea Org member and NOTs auditor herself. When she realized that it was all a scam, when she came up to OT VIII as a Sea Org member, she could not get a penny back, and all her family had been robbed of their fortunes. Her court affidavits are posted to view on the Internet.

It's outright disgusting to find out all the lies that we were told in the Sea Org about LRH and they are so covered up with public relations that I could puke over the glossy "Ron the this and Ron the that magazines". What a damn con show it is from the top of the org board, covering up the real truth what happened. LRH was nothing he claimed to be.

The LRH biographer, Dan Sherman, is working full time to make up stories to tell the public about what Scientology wants them to think of LRH. I found out that most of the stories are not true, and it's easily found on the Internet where you can read full books like "Bare-faced Messiah -- The true story of L.Ron Hubbard", by Russell Miller, ISBN# 0-7474-0332-5, and many others.
http://www.xenu.net/ and http://www.lermanet.com/ and alt.religion.scientology are some of my favorites, and those sites will link you to hundreds of others.

Then to find out from the Internet, the real facts about LRH and how he died! It's just outrageous what DM is getting away with. He belongs nowhere but behind bars! He's the biggest SP and criminal there is in scientology. The little midget spider in the big sticky nasty cult web!

LRH's body was full of psych drugs and just before he died, his will was changed by DM to make sure that all his wealth did not go to his family, but to RTC and under the control of DM. On the Internet, there are many documents of truth, from court records, LRH's death certificate, coroner's report and many other facts about what happened to many people, including Lisa McPherson.

Not long ago critics found out that Mary Sue Hubbard had died in 2002. Not a single word was said about her to any of us in the Sea Org, it was carefully silenced by management and OSA. No ceremony, no memorandums or even a simple issue about her. DM and his criminal crew made sure that she was shut off from any benefits in LRH's will and they are still trying to get away with it and keep it secret -- but it will be dug out one day.

I've been busy, getting adjusted to the real world, and I'm slowly getting out of the brainwashed think that was hammered into my head on a daily basis for all those years. One doesn't Really Know What "Freedom" Is All About When Working In The Sea Org, for a few bucks a week and little sleep and long working days. It's a wonderful feeling to be able to go down to Starbucks and read a newspaper, to find out what is going on in the world -- like the real truth about what people think about Tom

Cruise and not the PR bullshit that is being told at the inside.

I said that I would post about all those names and the friends listed out, but I've just been too busy enjoying my free life and getting on with some real work and study. I have followed the postings on the Clambake and I'm laughing out loud every time when I read anything from idiots like umike! He's dumber than a redneck! He disbelieves that I am who I am and keeps accusing others of being me. He's so off the mark in any of his guesses! I wonder if umike has any friends at all. Why would someone spend the majority of one's day, sitting on the Internet attacking others? What a waste of freedom!

The majority of the critics I respect have worked in the Sea Org or have been active public and know what they are talking about, while umike has to live with the fact that he wasn't even qualified and not accepted! If umike is not some covered up OSA puppet, he must be working on his "production record" to get back in good standing, getting through his A-E steps for being SP declared. He really fits the definition of an antisocial personality, as he's attacking anything and everyone who exposes the truth about Scientology and spews out lies and accusations faster than he can remember. Are you being paid by OSA umike, or ARE you OSA? I hate to remind you but the Clambake is there to EXPOSE the CRIMES of scientology, not to waste others' time with your dumbass comments or wasting space with useless old news. Could you just take care of your pit bulls and argue with you neighbors instead? Must be horrible trying to make friends by attacking them and then deny that you did! Or maybe you are a poor lonely soul out in Palm Springs selling velvet paintings of dogs' playing cards to make a living, like many scientologists I know. Do you buy them from Mexico like some other scientologists I know and that is why you call yourself "International Art Dealer"? Or is that also a fantasy or a lie or a dream? I just can't believe that an "International Art Dealer" has all that time typing all that bullshit and trashing people, trying to defend a criminal operation that is going to go up in smoke before too long.

Umike! Just stop arguing with others that "The RPF Insider" is not real, or that he is someone you think he is! Because you don't know! I will never have the time on my hands that you seem to have to spend on this activity, and it's such a waste of time to read any threads that you make a comment about. Get a life! Farther out in the desert, away from the Internet! Maybe you can make some friends with some rats or skunks, if even they will have you.

Scientology will never shut me up; I will be back, because I am really angry about what they are doing to people and I have a lot more to say. I also have a way to get more inside information!

For every one else, thank you for believing my true stories, and I
will finish the list as promised and I will publish all the other information I have, as well as the true stories of my friends. I hope you can understand what it is like to finally find out the truth after being a Scientology slave since I was a teenager. Please be patient.

This is True, RPF Insider

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

RPF schedule:

6:50 AM	Wakeup
7:00-7:10	Muster (roll-call and announcements)
7:10 - 7:30	Breakfast
7:30 AM	Roll-call in the course room
7:30 - 12:30	Study and auditing: No scheduled breaks, always arguments of being hungry and not fully able to study effectively. You have to sneak out and quickly get down some food that you managed to stash away in your locker or other hiding place, usually leftover food from lunch or dinner the day before.
12:30 - 12:50	Lunch
12:50 PM	Muster with the RPF I/C, announcements and organizing for working "on the decks", etc.
1:00 - 6:00	Hard work on the decks, usually construction, renovations or cleaning.
6:00 - 6:20	Dinner (Last and 4th seating on the base, when all other 600 staff from all the orgs are done eating. RPF also has to clean up, take out garbage, take all the serving dishes to the galley, etc.)
6:20 - 6:40	Muster/roll call. Sometimes with the RPF I/C, not always.
6:40 - 8:20	Back to construction and cleaning work. The time on the decks is 8 hours and 5 hours study. One has to "work hard" to "earn your own redemption" to be able to get back in the group. Your hard work is supposed to upgrade the buildings and the environment and thereby create income.
8:20 - 8:50	Clean up tools, complete I/P projects and transport back to the base if away on some other work site.
8:50 - 9:10	20 minutes to take a shower with another 50 or so guys in about 8 stalls. The showers are on the 6th floor and all RPFers have to take the stairs and can not use the elevator unless approved by the Medical Liaison Officer and the RPF I/C. (Few are approved.) In other words, the guys that have been on the program for a few years have been running up and down those stairs to the top floor over a thousand times!
9:10 - 9:30	Clean berthing area.
9:30 - 9:50	Muster with the RPF I/C, sometimes longer (until 10:00 PM).
9:50 - 10:10	Brush teeth, prepare to secure. In some of the rooms where 30 to 50 people are berthed in 4 tier bunks, this involves sharing a bathroom and standing in line to slide into your bunk, as there is not room for more than few at a time to get into bed.
10:15 PM	Lights out. Per the schedule RPFers are entitled to 7 hours of sleep in order to be able to study and go in session to get through the program. This is usually enforced and rarely compromised with. There is basically NO TIME for anything else; you are supposed to write the few letters and personal things you need to handle in the 20 min lunch and dinner break! This is when you

	are standing in line for 5-10 minutes and only get 10-15 minutes to eat! You literally have to shove it down your throat and run to the next muster.

This is the basic schedule for an RPFer "on the decks". Sometimes it changes, like when someone got the fabulous idea to have us all get up at 5 am so that we would be even less likely to be seen by the other staff. Nobody was "sessionable" at that ungodly hour, so they eventually changed it back. Other times there might be a Hill 10 or a special project, and then study time is cut back or canceled.

There is a smaller RPF unit called the Tech Unit, these are the RPFers who have advanced on the program and are well into or near the end, and are now acting as Course Supervisors, C/Ses and Co-Audit supervisors for the rest of the RPF. If you are in the Tech Unit your 8 hours of deck time is cut down to 3 as you have to spend the other 5 hours supervising and assisting the other ones on top of your own 5 hours of study.

The only person who is not in the RPF is the RPF I/C himself, who is posted in the Qualifications Division of the CLO (Continental Liaison Office) and responsible for getting everybody through and graduated. His final "product" is someone who graduates. His stats haven't been very good the past few years, especially with so many bogging down at the end on the new "Final Assessment". I wrote about it earlier. (It is basically an extensive sec check on disagreements with Management, DM, etc.) So maybe he should CSW to have his stat changed to "Offloads, Fitness Boards and SP Declares"!

The RPF Insider: daily schedule on the RPF
The RPF Insider writes to Collin Powell

Here is a letter the RPF "Insider" recently sent to the US Secretary of State, Colin Powell, concerning the welfare of foreign persons trapped in Scientology's RPF, some of whom entered the country on a "religious worker" visa.

Secretary Of State
Mr. Colin L. Powell
U.S. Department of State
2201 C Street NW
Washington, DC 20520

Scientology Abuse of Foreign Citizens in the USA; an official plea for investigation.

Dear Mr. Powell,

Attached please find a list of citizens from many countries who are currently or were recently held in gulags (prison camps) in the United States of America by the "church" of Scientology. This is happening right now in "Rehabilitation Project Force" (RPF) centers run by this "church" where members who disagree with scientology management are sent for punishment and re-indoctrination. Average internment is 2 to 10 years. Many of these citizens from many Nations were granted visas as "religious workers" or "students" of Scientology.

Once in the US, members are heavily recruited to join the Sea Organization. The Sea Organization is a secret insider order of scientology, where all members are required to sign a "billion year contract" to help scientology "clear the planet". Any person who joins the Sea Organization and then later disagrees with its practices will soon find him or her self confined in the scientology gulag known as the "RPF" (Rehabilitation Project Force). The conditions these people live in are inhumane and violate many US laws, as well as prisoner of war standards as agreed by the United Nations and the Geneva Convention. The issue here is not scientologists' right to freedom of religion. The issue is scientology's violations of basic Human Rights. These two rights should not be mutually exclusive; both are guaranteed by the US Constitution.

This "church" does not care for or take responsibility for their members as promised and required when they were allowed to come into the United States as "Religious Workers". It is doubtful that Scientologists should be granted religious worker status, as the "church" is in violation of many State Department rules. Many Countries do not recognize scientology as a religion at all. In the US, it was

granted religious tax exemption in 1993 under unusual conditions which are now being disputed in court.

Compensation: Sea Org members are required to work for 10.5 hours a day, 7 days a week and they receive only a small stipend, usually 50 US dollars/week, of which FICA and tax is withheld and the standard net payment is $46 and some cents. The actual work time is disguised by the statement that there are 8 hours of work time and 2.5 hours of "study". The study activities are mainly indoctrination to learn how to perform your work duties and how to comply with the many rules and policies of the organization. There's no "study" of anything other than scientology, and many times this is canceled in order to meet production quotas, called "statistics". If the "stats" are down, members are frequently required to work even more hours. Many weeks this minimal pay is cut down further, due to other "financial planning priorities". I would like to bring to your attention that the United States Government has laid out the federal poverty guidelines for religious workers which is about $12,000 per year per person. The annual pay per the current Scientology system only gives a Sea Org member $2,390 annually. No medical or other benefits are provided. Additionally, members of the Rehabilitation Project Force (RPF) are only granted 1/4 of full pay, i.e. $11 and some cents/week. Even this is many times cut down to half of that, i.e. 1/8 of full pay or about $5 and some cents. This is annually around $300 to $600. This system is built on the assumption that a Sea Org member is doing his work "voluntarily" and this way of reasoning is justified with the fact that he is given food, berthing and a uniform.

Housing: The value of the housing, uniform and food is questionable, and in the case of housing especially, violates many fire, housing and safety codes, as up to 50 people are packed into bunks stacked to the ceilings in rooms meant for 2 to 4 people. Hundreds are forced to use a single shower room, and bathrooms are shared by approximately 25 full time residents each. Further information about the RPF living conditions can be found at:

http://www.xenu.net/
http://www.lermanet.com/rpf-insider/
http://www.lermanet.com/scientology/gulags/2CreationofRPF.htm?FACTNet
http://www.freedomofmind.com/resourcecenter/groups/s/scientology/RVYmodel.htm

as well as in hundreds of other affidavits, court documents and stories available on the internet.

Labor Abuse: Scientology is investing millions of tax free dollars into buying new buildings to entice new members, and make a profit from the tax free dollars they collect from their deluded adherents (who believe the money donated is going to better mankind). They get the buildings renovated and upgraded by using the "free" or "slave" labor of Sea Org members, especially the RPF members. Per the US Dept of State, workers on religious visas may NOT work as "janitors, maintenance workers, clerks, fundraisers or persons involved solely the solicitations of donations."

Lack of Benefits: "To qualify for the visa, the applicant must show that he or she will not become a public charge, that is, rely on assistance from the government." Scientology does not have any kind of insurance for most of its members and most medical expenses are born by US taxpayers. If a member should require medical or dental attention, they are required to fill out state aid forms identifying themselves as "indigent." They are also encouraged to abuse other social programs such as SSI, MediCal and Medicare. Scientology uses many methods to persuade Sea Org members to give up all responsibilities to their families and children, and they are encouraged to abandon family responsibilities to welfare and ADC (Aid to Dependent Children.)
http://travel.state.gov/visa/frvi_waivers.html (see section (4) (a) and (b)).

Illegal Detention: RPF members in the Sea Org are not allowed to leave the premises, not even for

medical treatment unless accompanied by "security" personnel to ensure their adherence to the "shore story" (party line). Should someone manage to escape, scientology security will guard every means of exit, such as airports, bus stations, subways, etc. Also they will spend weeks investigating the escapee's family and friends and use Private Investigators to track them down, even picketing people's homes and harassing their friends, family, neighbors and employers. People assigned to Scientology's RPF have their passports, visa, IDs, credit cards and other documents confiscated and locked up so that full control can be enforced on the member, in an attempt to prevent him from leaving without permission. Permission to leave is only granted after an extensive "routing out" procedure has been completed, which includes intensive re-indoctrination, "security checks" on the e-meter (a scientology lie-detector) and many pages of other forms and gag agreements. Completing these requirements takes months and sometimes years, all the while those wishing to leave are held in virtual isolation under 24 hour guard. RPF members are considered to be security risks, especially if they have been to or worked at the "top secret" international base and headquarters at Hemet California, where Golden Era Productions and Mr. Miscavige are also located. This is done in an attempt to scare ex-members from speaking out or taking any legal action against the church or management once they are finally allowed to leave.

Isolation: People assigned to scientology's RPF are forced to work at hard labor for an average of 2 to 10 years for approximately 11 dollars per week in pay. They are not allowed access to their own mail, nor to newspapers, TV, any music, radio, books or the Internet. It is forbidden for any sea org member to touch the internet and they are told "it contains harmful, confidential data, detrimental to your well-being" in an attempt to hide the true facts about scientology and the lies and crimes of scientology management, including Mr. Miscavige. Also, all mail to all sea org members is opened and scanned into a security computer system. Personal mail containing any criticism of scientology is sent to the "ethics department" and withheld from the addressee. RPF members are essentially cut off from reality for years. They are further not allowed to contact their own families or children unless there is a "PR" (public relations) issue, in which case a staff member might be allowed a phone conversation or letter that is scripted and observed by scientology security and designed to reassure those concerned that there is "nothing to worry about." ("Good Roads, fair weather" per a scientology policy.) Social gatherings such as weddings, anniversaries, family reunions are forbidden and in rare cases a funeral attendance can be granted, but the member will be accompanied by scientology security.

Harassment: Millions of tax free dollars are spent by scientology every year to file lawsuits against their perceived enemies. (Which are legion, see the 1993 enemy list at http://www.xenu.net/archive/enemy_names/, I am sure there are thousands more since then.) Millions more are spent on other activities such as lawyers, PI investigations and "Black PR" campaigns in an attempt to eradicate and silence critics. Should an escapee or ex-member dare to speak out, this cult will often harass them for years with frivolous lawsuits and various other intimidation tactics. The behavior of this cult has been well documented by many sources, including TIME magazine, a 60 Minutes TV documentary, many books, newspapers, court cases and government inquiries, just to name a few.

Blackmail: This cult uses "lie detectors" (e-meters) to force confessions of embarrassing personal and family secrets which they then use to blackmail people to keep silent. Part of the indoctrination into scientology is the belief that any disagreement with scientology and its management, and anything bad that happens (such as illness, accidents or death) is all your own fault and due to "out ethics". Sea Org and RPF members are frequently put on the e-meter (lie detector) and are forced to confess to the slightest bad thought. Members are also held accountable if they suspect "out-ethics" in other members and are required to write "knowledge reports" on each other or suffer severe consequences.

Disconnection: Many married members have been forced to divorce if one of the spouses dares to defy scientology management. All scientologists are forced to adhere to a policy called "disconnection", whereby they are forced to have no contact with any friends or family members (including their own minor children) who express disagreement with scientology.

Retirement: "Retirement" in this cult occurs when a member becomes too old or sick to work. There are members of the Sea Organization at the location of 1308 L. Ron Hubbard Way, Hollywood, CA who are over 80 years old and still working. Members who are too ill to work are kept in isolation and abide by the same rules of no family contact, no TV, Books, etc. as the rest of the RPF. The routine to offload "useless' members from the RPF program is called a "Fitness Board Turndown" and many are put out on the street with only $500 in "severance pay" after many years of labor (in many cases 20 or more years), with no retirement funds and no useable work history or skills. They end up dependent upon Social Security, or the mercy of family they haven't seen in years. Occasionally, Scientology Security will prevail on Public Scientologists to create a job for these unfortunate people. When so released from duty, they are forced to sign 15 or so pages of "nondisclosure" agreements wherein they are required to promise to never reveal the truth of what it is like to be a Sea Org member, especially one assigned to the RPF.

Child Abuse and Neglect: Child Welfare authorities in California and Florida are well acquainted with Scientology. Members are now discouraged from having children due to the many legal "flaps" over the years. Children are considered to be "off purpose" as they take time away from "production" and "getting the stats up". Many members have been coerced into having abortions. Children who are raised in scientology are separated from their parents, live in squalid conditions with minimal supervision, and are "trained" in scientology schools using "scientology tech". Many do not graduate High School. When they rebel, they are sent to the RPF (where many spend years) or are offloaded and declared "SP" (Suppressive Persons) and forced to disconnect from their parents and other family still in scientology. See: http://www.factnet.org/Scientology/children.htm

This is all taking place daily right here in the US, while the Chairman of the Board of Scientology, David Miscavige, and his celebrity friends are known to frequent casinos in Las Vegas and the Caribbean. Mr. Miscavige is living in luxury quarters at the Hemet Base and in Hollywood, California where he has 2 additional luxury suites that were built and are maintained by Sea Org members at no charge to him or to the church. There are many court cases and affidavits available on line testifying to the conditions under which sea org members and their families live. The "RPF" in which all of the below mentioned persons are or were held recently is located at 1308 L. Ron Hubbard Way, Los Angeles, CA 90027. There are other "RPF" facilities located at scientology continental bases in Clearwater, Florida, Copenhagen, Denmark, and Hemet, California, also in the UK at East Grinstead, Sussex, England (AOSHUK) and in Australia at the ANZO base in Sydney. Following are some of the US State Department rules and policies regarding Religious worker visas, which in many cases are being TOTALLY VIOLATED by the "church" of Scientology. Following this document is a list of some 230 current or recent RPF members, listed out by country. Copies of this letter, along with supporting documents are being sent to the Consulates, Immigration authorities and State Departments involved, as well as being posted on the internet. It is our sincere hope that these charges will be thoroughly investigated, and that until such investigation is completed no new Religious visas will be approved for the "church" of Scientology.

Sincerely,

The RPF "Insider"

US department of State religious visa page: (see section (m))

http://uscis.gov/lpBin/lpext.dll/inserts/slb/slb-1/slb-9974/slb-12541/slb-13339?f=templates&fn=document-frame.htm#slb-8cfrsec2045
http://pjclaw.net/index.html

1. Who can apply for a religious worker visa?

Religious worker visas are available to people coming to work for a religious organization in the United States as a minister, in a religious professional capacity, or in a religious vocation or occupation. "Ministers" are individuals authorized by a recognized religious denomination to conduct religious worship and perform other duties normally performed by the clergy.

"Professional capacity" means that the position the individual will be working in requires at least a bachelor's degree.

A "religious occupation" is any activity which relates to a traditional religious function. Persons in a religious occupation include liturgical workers, religious instructors, missionaries, religious counselors, workers in religious hospitals or health facilities, cantors, catechists, or religious broadcasters, but not janitors, clerks, or persons involved solely in the solicitation of donations.

A "religious vocation" is a calling to religious life evidenced by the demonstration of a commitment practiced in the religious denomination, such as the taking of vows.

4. How much do I need to be paid?

There is no set answer to this question. To qualify for the visa, the applicant must show that he or she will not become a public charge, that is, rely on assistance from the government. That means that the sponsoring organization must offer to cover all the applicant's expenses (as in a religious order, for example) or to compensate the applicant sufficiently.

Although there is no stated minimum salary for religious workers, my office generally recommends individuals receive compensation worth 125% of the federal poverty guidelines, or about $12,000 for one person.

5. Can I work in a second job in addition to my religious occupation?

R-1 status only allows you to work for the sponsoring organization; outside employment is not permitted. However, it is possible to have two or more organizations of the same denomination sponsor you for part-time work with each organization.

Once you obtain permanent residence, you can work outside of the sponsoring organization.

8. What is the process for obtaining the visa?

R-1 non-immigrant status. If you are outside of the United States, you do not need to file a petition ahead of time. You simply take the supporting documents to a US consulate to apply for the visa.

If you are already in the United States on a different non-immigrant visa, the sponsoring organization files a petition to change your status to R-1 religious worker and extend your stay.

Permanent residence. Whether you are in the United States or abroad, the sponsoring organization begins the process by filing the immigrant visa petition with a CIS service center. Once the petition is approved, you file an application for permanent residence with CIS, if in the United States, or, if abroad, apply for an immigrant visa with a US consulate. You become a permanent resident once you enter the United States with the immigrant visa.

10. What if I am out of status?

If you are out of status (i.e., you have overstayed your visa or you entered without one), in most cases you cannot change status to R-1 religious worker or adjust status to permanent resident. You may be successful by returning to your country to apply for the religious worker visa, but there are serious penalties for staying in the United States illegally. It's recommended to speak to a lawyer before choosing this course of action.

If you were the beneficiary of an immigrant visa petition (I-130 or I-140) or labor certification before April 30, 2001, you may be able to adjust status to permanent residence under section 245(i).
